Because the job interview is dynamic and individualized, it is not possible to provide you with exact questions and answers that you might face in the process. However, listed below are some general tips, as well as some common questions that most candidates face at some point in a traditional job interview. The list is not exhaustive, only a general guide to get you started. See Ready Reference G-7 for information on behavioral interview questions.

6 Practical Interview Tips
1. Listen. Do not anticipate the question or interrupt the interviewer.
2. Speak in specifics, not generalities. Think of the interview as a process of storytelling in which your role is the dissemination of specific information about your personal qualities and life experiences.
3. If you don’t understand a question, simply ask, “Just so I understand, what you’re asking is…” or paraphrase the question back to the interviewer.
4. Stress important skills that all employers are looking for including initiative, honesty, reliability, teamwork, and communication skills. Use personal examples to reinforce these qualities.
5. Be honest at all times. Integrity is a highly valued quality in today’s world.
6. Be yourself. Beyond the professional skills and education you bring to the interview, the process is also about whether your personality fits into the culture of the organization.
